Dr. Edward L. Jenkinson has been appointed Professor and Chairman of the Department of Radiology, to succeed Dr. James T. Case, who retired with the rank of Professor Emeritus. Dr. Jenkinson received his B.S. degree from St. Louis University and his M.D. degree from the same institution in 1915. He served his internship and residency at St. Luke's

Hospital, St. Louis, from 1915 to 1916; internship was followed by training in radiology at St. Luke's Hospital, Chicago, and the Battle Creek Sanitarium, with Dr. Case. Dr. Jenkinson served as a Major in the United States Army during World War I, with duty in France and Germany. He joined the teaching staff of Northwestern University as an instructor in 1920, followed by appointments as Assistant Professor in 1924, Associate Professor in 1932, and Professor and Chairman of the Department of Radiology in 1947.

Dr. Jenkinson has been Director of the Department of Radiology at St. Luke's Hospital, Chicago, since 1916; he acted as Director of the Department of Radiology at the Evanston Hospital from 1922 to 1929, and in similar capacity at St. Joseph's Hospital from 1923 to 1939.

Prominent among his numerous society associations are the following: Charter and active member of the American Board of Radiology since organization in 1934,

serving as President from 1947 to 1949; past President of the American Roentgen Ray Society (1939); Chairman of the Section on Radiology of the American Medical Association (1938) and of the Illinois Medical Society (1930); past President of Chicago Roentgen Society (1923-1926 and 1930-1931); member of the Board of Chancellors (1939-1940) and Treasurer (1935-1939) of the American College of Radiology; member of the Board of Governors of the Institute of Medicine of Chicago (1941-1946); member of the National Advisory Board of Medical Specialties (1947-1949) and Chairman of the Directory Committee of the Directory of Medical Specialists Dr. Jenkinson has contributed approximately one hundred articles to the literature in the field of radiology.

EARL E. BARTH, M.D.

Dr. Stafford L. Osborne has recently been appointed Chairman of the Department of Physical Medicine. This distinction comes as a well earned recognition of his academic accomplishments and many years of unselfish service to the University and to the cause of physical medicine.

Dr. Osborne, a Canadian by birth, became a member of the Department of Physical Medicine at this University in

1928. His academic promotion from Instructor to Assistant Professor occurred in 1940; in 1944 he became an Associate Professor, and in 1948 attained the rank of Professor of Physical Medicine.

Throughout his career he has shown an active and constructive interest in research as pertains to the response of normal and diseased subjects to physical agents. Many of his studies on animals and man have dealt with physical means of producing hyperplexia. For many years the Council on Physical Medicine of the American Medical Association relied heavily on Dr. Osborne for advice concerning the merits of physical medicine equipment. Dr. Osborne has published two books in addition to making nearly one hundred other contributions to scientific books and periodicals. The most recent book by Dr. Osborne and H. J. Holmquist deals with the physical and physiological aspects of electrotherapy.

The Department of Physical Medicine of Northwestern University is one of the pioneer departments in physical medicine and it is fitting that Dr. Osborne, also a pioneer in physical medicine, should conclude his active professional career as

its head.

SMITH FREEMAN

Dr. Guy P. Youmans, the new Chairman of the Department of Bacteriology and Immunology, is a product of the State of Washington, where he received his early training. He was graduated from the University of Washington in 1931 with the degree of B.S. He remained

there to do graduate work and was awarded the degrees of M.S. in 1932 and Ph.D. in 1935. In 1936 he came to Northwestern as an Instructor in Bacteriology, and later took part time medical work, receiving his B.M. degree in 1941. This was followed by an internship in the Evanston Hospital and his M.D. in 1942. He returned to the Medical School as an Assistant Professor of Bacteriology, in 1946 he was made Associate Professor, and in 1949 a full Professor. He developed rapidly as a successful investigator and teacher, respected by his associates and students, recognized as such by being made chairman of the department. Under Dr. Youman's direction the future of the department is assured.
